

Medical Intake Form Instructions

Reproductive Medicine Associates of New Jersey, LLC

Medical Intake Form Preparation:

Each patient who visits RMANJ is directed to complete and submit a medical intake form. These medical histories allow our physicians to make the most accurate assessments of your fertility status and devise the most appropriate treatment plans. Please select the form from our website that most accurately reflects you as a patient.

For Couples:

If you are seeking our services as a couple, each partner in the couple must complete his or her own intake form. This applies to both heterosexual couples and same-sex couples. Please select the most appropriate form for each partner from our website, complete both forms, and return all forms to your primary office. While each partner should complete *all* sections on his or her own medical history, only one copy of the couple's shared infertility history (starting with page 7 on the female form, page 6 on the male form, and page 8 on the transgender form) should be submitted.

PLEASE COMPLETE THIS FORM AND RETURN IT TO OUR OFFICES **7-14 DAYS** BEFORE YOUR NEW PATIENT APPOINTMENT.

If you have any questions, please contact our New Patient Liaisons at 973-656-2089.

Forms may be faxed to 973-290-8370 or dropped off in person at any of the following office locations: Basking Ridge, Eatontown, Englewood, Morristown, Somerset, or West Orange. If you would like to send completed forms electronically, please contact our patient liaison team for a secure email link at **973-656-2089**.
