

Important information

Roads and Maritime Services must be able to attest that all drivers of public passenger vehicles are fit and proper persons to hold an authority to drive such vehicles. This information is being collected in order to determine your fitness to drive a public passenger vehicle under the Passenger Transport Act 1990 and Passenger Transport Regulation 2007. If Roads and Maritime cannot attest to you being a fit and proper person to hold an authority, the authority may be suspended, varied or cancelled or your application for authorisation may be refused.

You have a right to request access to the information collected by contacting Roads and Maritime, the contact details are at the end of this form. Roads and Maritime may disclose any health information received to a medical practitioner and/ or specialist.

- If you are lodging this as part of your taxi-cab or private hire vehicle driver authority and you are under 60 years of age, you need to complete Medical Assessment Form Private Hire Vehicle and Taxi-cab Drivers - Form 1799
- Make an appointment with your doctor. As the examination may take longer than a routine consultation, please advise the receptionist when making the appointment that you are attending for this purpose.
- If you wear spectacles, hearing aids etc. please take them with you to the examination.
- Complete Parts A and B of this form, including signing the Declaration/Consent (Part C), and take it with you to the appointment so the doctor can complete Parts E, F and G.
- You are required by the Passenger Transport Regulation 2007 to advise Roads and Maritime of any condition that may affect your ability to drive a public passenger vehicle. You should make the doctor aware of any medical condition/s you have so that your doctor can advise Roads and Maritime, on your behalf using this form.
- If the medical assessment/report has been requested for a particular reason, you should let your practitioner know this reason.
- On completion of the examination the doctor will complete Parts E, F and G of this form, after which you should return the whole form to Roads and Maritime. (Refer to Part D for lodgement details)

 Payment for any medical examination is the responsibility of the 	ne authority holder/applicant.
Part A – Driver Details – to be completed by driver / applicant for authorisation	Part B – Medical Questionaire – to be completed by driver / applicant for authorisation
1. Surname (family name)	Please answer the questions by ticking the correct box and supplying details (if applicable). If you are not sure, leave the question blank and ask your Medical Practitioner (doctor) what it means. You must then answer the question with your doctor.
2. Given names	Your doctor will also ask you additional questions during the examination.
3. Sex Male A. Date of birth Female	11. Are you being treated for any illness or injury? Yes if yes give details No Details
5. Residential address (PO box not accepted) Postcode	
6. a Contact phone number b Mobile number	12. Are you taking any medications (either prescribed by your doctor or otherwise)?

Enquiries:

Important information for Medical Practitioner

- The medical examination must be conducted in accordance with the commercial medical standards described in the "Assessing Fitness to Drive, Commercial and Private Vehicle Drivers (2012)". This publication is available from the web on www.austroads.com.au. It details the examination process, but the forms you must use are those provided by Roads and Maritime and/or TfNSW, not those given as examples in the appendix to the standards. The criteria to be used are those detailed in the right hand column, marked "Commercial Standards".
- Upon completion of the examination complete Parts E and F and sign Part G of the form and give to the patient to return to Roads and Maritime and/or TfNSW.
- You should retain a copy of this form for the patient's medical record together with detailed examination notes.
- Information not relevant to the patient's fitness to drive should not be forwarded to Roads and Maritime and/or TfNSW.
- If you have doubts about the patient's fitness to drive, please give reasons in the comments section on the form, and arrange referral to a specialist for an opinion (see below).
- If you recommend consideration for a conditional Authority, you will need to make a referral to an appropriate specialist(s) and hand the Medical Specialist Referral form to the applicant/driver to take to the specialist(s) for completion.
- You may also recommend a practical driving test to assess fitness to drive. Please indicate this in the final section of the form, the Medical Assessment Certificate.
- If you have any doubts about the information required, or wish to discuss the case, please contact Roads and Maritime and/or TfNSW.

Driving Assessment

There are two types of Driving Assessments:

- A Practical Driving Test can be conducted by an Accredited Driving Assessor. This type of assessment looks at a
 driver's ability to safely handle the type of vehicle in question, e.g. taxi, bus, motorcycle etc. Note; any cost involved is
 to be met by the driver.
- More complex assessments may be requested with a Driver Rehabilitation Unit, or by an accredited occupational
 therapist, if warranted. Normally this would only be required in cases where the driver has a disability which could
 compromise safe and effective control of the vehicle. Additional medical specialist advice may also be required, e.g.
 from an occupational or rehabilitation physician, in such cases. Your local office listed on page 3 can assist with
 locating the closest suitable provider for these assessments.
- The main aim of assessment by an occupational therapist or Driver Rehabilitation Unit is to assist people with impairments to resume or continue driving. There are two components of the assessment. The first part of the assessment aims to evaluate the person's difficulties. This involves an interview, vision screen, cognitive function test, assessment of physical strength, motor skills, reaction time, road law and road craft. The need for specialist equipment of vehicle modifications is considered at this time.
- The on-road assessment takes a standard approach but can be designed to meet individual needs. It is conducted in
 a dual controlled vehicle, accompanied by a driving instructor and where necessary set up with special requirements
 or modifications to meet the needs of the driver. The assessment is structured to assess the impact of injury, illness or
 the aging process on driving skills such as judgement, decision-making skills, observation and vehicle handling.

Conditions and Restrictions

- If appropriate, the medical practitioner may recommend conditions which may be imposed upon the driver authority
 and that go to driver competency or safety and allow the driver to continue to drive (e.g. corrective lenses, no night
 driving, additional mirrors).
- If the medical practitioner makes a recommendation to impose conditions, reasons must be provided.
- If the medical practitioner is of the opinion that vehicle modifications are necessary (e.g. hand controls, left foot
 accelerator), or a prosthesis is necessary to drive safely, or that a local area driving restriction is appropriate, the
 driver will need to demonstrate the ability to drive safely with these restrictions. In these cases a driver assessment is
 necessary.
